POSITION TITLE: Engineering Intern

POSITION LOCATION: Sparks, NV

POSITION DESCRIPTION:

The engineering intern position is an entry-level technical position intended to provide the employee with industry experience, a familiarity with SNC, and enable SNC to obtain an in-depth evaluation of potential future staff members. The position is usually part time, filled by students in graduate school or the last two years of their undergraduate program.

An engineering intern may be assigned a wide range of duties depending on the specific background of the individual. Assignments are typically performed under the close supervision of a senior member of the engineering staff.

ESSENTIAL FUNCTIONS:

Software and / or hardware design/development and documentation tasks Assist in preparation of data items (CDRL's) engineering lab assignments, usually involving making quantitative tests using equipment typical of the engineering discipline appropriate for the intern. Punctuality to work each day and prepared to work scheduled work hours.

DESIRED MAJORS: Electrical Engineering

REQUIRED QUALIFICATIONS:

- Latter 2 years of undergraduate studies in electrical engineering major.
- Knowledge of schematic capture, circuit design and theory of electricity/electronic components desired.

POSITION TYPE: Part-Time
