POSITION TITLE: Software Test Engineer

POSITION LOCATION: Reno, NV or San Francisco, CA

POSITION DESCRIPTION:

Grand Rounds is seeking a great test engineer to join our tight-knit team. This is a junior role that will allow you to mature into an awesome full-stack developer. You'll be joining an agile team that supports doctors, case coordinators, and the world's best physicians with the applications and features they need to deliver patient success.

Responsibilities:

- Provide application support for patient-facing operations;
- Work with QA to break our software and understand bugs (RoR);
- Create, run, and refine automated testing suites (RSpec and Capybara);
- Maintain and improve our continuous integration servers (Docker/Drone);
- Support QA's work in Selenium;
- Participate in all aspects of testing—functional, regression, load, and system testing;
- File bugs in Tracker; and
- Work with your fellow engineers to develop and verify the fixes.

DESIRED MAJOR: Computer Science and Engineering

REQUIRED QUALIFICATIONS:

- You have at least one year of experience coding in a high level language like Ruby or Python or a functional language like Haskell or Erlang;
- Passion for browsing the web, and breaking web-based software;
- Ability to work in a team, flexibility, and the ability to handle multiple tasks;
- Fanatical attention to detail with a self-starter's mentality; and
- Reliable, analytical, problem-solving and troubleshooting skills.

HOW TO APPLY:

Interested students should apply online at <https://www.grandroundshealth.com/careers/#op-39336-software-test-engineer>.
