Leap Forward Gaming

Software Engineer

Exciting, rapidly growing startup company needs web developers. We are looking for applicants who are you passionate on delivering the best possible UI, and standing apart from the crowd.

Leap Forward Gaming (LFG), a Reno, Nevada based company, is currently seeking software engineering professionals to design and develop leading edge software solutions. Successful applicants will be highly motivated, results-driven, and enjoy working in a fast paced, team oriented environment under minimal supervision. We are a young company owned, backed and managed by highly successful gaming professionals. We aim to quickly become a leading force in the casino gaming industry. The right people will share in the rewards of that success.

Responsibilities:
- Create exciting, innovative, leading edge UI targeted for the casino gaming industry
- Architect, Design, Develop, Debug, Document and Test software solutions
- Participate in peer group brainstorming sessions
- Perform code reviews and design reviews
- Implement software security concepts

Requirements:
- BS degree in Computer Science, Computer Engineering or Electrical Engineering
- Strong problem solving skills
- Team oriented with excellent written and verbal communication skills
- Must be able to obtain a Nevada Gaming Card
- Local candidates only

Desired industry experience:
Any combination of the following: HTML5, CSS, AngularJS, .NET, JavaScript, Web services, AJAX, SOAP, XML, ASP
Games and gaming experience
Software development lifecycle and processes such as Agile, Scrum and Extreme programming

Please send resume to jobs@lfg-usa.com.
