POSITION TITLE: Systems Engineer Level One

POSITION LOCATION: Reno, NV

POSITION DESCRIPTION:
This is a unique opportunity to participate in a fast paced, technology diverse environment. This business is experiencing annual high double digit growth. Discover what your niche is! I own and operate an IT managed services provider here in Reno. My company has been around for 4 years. I've been in IT for 20. The work is never boring and you get your hands dirty (sometimes literally) with most of the latest technologies. Great Divide IT provides IT services for a wide array of companies: hotels, mining, finance, retail, law, medical, etc. My company leverages automation to manage over a hundred devices. You will have the opportunity to not only learn what that means but actually help deploy it! Do you know how to install software to one hundred computers with one keystroke? Do you want to see what a real private cloud looks like? Better yet, help engineer and support?

I am willing to pay for the right student but it's vital that you have the necessary drive and that you want to learn. There is much to learn.

Personality traits:
- Natural troubleshooter
- Professional
- Process oriented
- Finish what you start
- Not afraid to ask questions
- Can put the pride aside and say "I don't know".
- Reliable
- Trustworthy
- Naturally inquisitive
- Has a means of transportation

DESIRED MAJOR: Computer Science & Engineering

PREFERRED QUALIFICATIONS:
- Windows Server technologies (physical and virtual)
- Firewall security
- Disaster recovery/business continuity
- Secure remote access
- Any programming language
- TCP/IP
- VoIP
- Any Sophos products
• Windows Client OS (10, 8, 7, etc.)
• Linux, CentOS
• Labtech RMM
• Connectwise PSA

**HOURS AND SALARY INFORMATION:** Part-time temporary to start with potential to turn into a full-time, long term opportunity. Pay is $20/hr and can work from home. Computer provided.
