POSITION TITLE: Application Integration Developer

POSITION LOCATION: Reno, NV

POSITION DESCRIPTION:
The Application Integration Developer serves in the planning, coordination, solution development, and implementation activities related to the integration of applications and technologies within the organizations application integration environment. Duties include, but are not limited to:

• Designing, developing, testing, implementing, documenting, and supporting new and existing enterprise application integrations
• Modifying, testing, implementing, and supporting web-based ancillary business applications in accordance with the software development life cycle
• Working with users to identify project requirements and developing application integration to meet their needs
• Researching new solutions and best practices for application development on campus
• Working directly with other UNR OIT teams, functional owners, and end users to define system specifications and to ensure compliance and security of these services
• Providing necessary troubleshooting, configuring, and/or programming changes to address end user needs

PREFERRED QUALIFICATIONS:
• Bachelor’s degree
• 80% FTE (32 hours per week) for eleven months
• Knowledge of programming languages and tools to include, but not limited to: Java, Visual Studio, C#.NET, VB.NET, ASP.NET, and SQL Reporting Services
• Knowledge of general object oriented programming concepts
• Knowledge of relational and data databases
• Knowledge of desktop and server computer hardware and operating systems

HOW TO APPLY:
Interested applicants should send in a resume and cover letter to Lisa Saichompoo at help@unr.edu.
