POSITION TITLE: Engineering Intern

POSITION LOCATION: Reno, NV

POSITION DESCRIPTION:
We are seeking a reliable, motivated, and hardworking Engineering Intern to join our team. Under supervision the candidate will work closely with the engineering staff to learn basic engineer duties within the company. Duties include but are not limited to:

- Assist the engineering staff to improve existing products and develop new ones.
- Build prototypes under the guidance of engineers
- Some drafting and design work
- Communicate with other departments
- Assist in transitioning products to a manufacturing environment while working with production staff

PREFERRED QUALIFICATIONS:

- Practical understanding of engineering principles and methods
- Statics and Solid Mechanics course work
- Must be proficient in CAD (CATIA, SolidWorks, Solid Edge, etc.)
- Current Junior/Senior level mechanical engineering student
- Experience with hand + power tools; experience in fabricating, assembling and disassembling mechanical parts
- Ability to work with CNC machines
- Ability to work safely, alone and with others in an industrial setting

HOW TO APPLY:
Interested students should apply at https://jobs.lincolnelectric.com.
