POSITION TITLE: Software Engineer

POSITION LOCATION: Reno, NV

POSITION DESCRIPTION:
Bioelectronica is seeking a software engineer who can help with prototyping and engineering biomedical devices. Bioelectronica is a cutting-edge healthcare startup that merges software engineering, medical diagnostics and drug research. Our facilities are located on campus at the University of Nevada, Reno. Working with our seasoned technical team will provide a unique experience for individuals interested in fast-paced product development and learning about success in Silicon Valley.

Duties include but are not limited to:

- Prototyping and engineering biomedical devices
- Embedded Design
- Electrical work

PREFERRED QUALIFICATIONS:

- Familiar with: Python, Linux, C++
- GUI development experience
- Familiarity with OpenCV
- Control systems / robotics experience
- Embedded design

HOW TO APPLY:
Interested applicants should send their resume and cover letter to Jonathan Hull at jonathan@bioelectronica.com.
