POSITION TITLE: Electronics Manufacturing Technician I

POSITION LOCATION: Minden, NV

POSITION DESCRIPTION:
XP Power is a major supplier of critical power conversion technology to the medical, technology, industrial, and defense markets. XP Power is looking for an Electronics Manufacturing Technician that supports production and testing through designing, providing, maintaining, and calibrating equipment used in the manufacturing process. Duties include, but are not limited to:

- Design, document, build, and implement equipment and tooling used in the manufacturing process
- Calibrate, verify, maintain, and repair tools and equipment
- Maintain calibration/preventative maintenance databases
- Train Associates on safe and appropriate use of tooling and equipment
- Perform advanced testing on non-conforming product
- Disposition discrepant products and material
- Troubleshoot and perform Root Cause Analysis (RCA) of failing product and equipment
- Write documentation for RCA purposes
- Collaborate with Associates, Engineering, and Leadership to improve current processes
- Identify and correct errant procedures through the document control process
- Follow all ISO procedures and policies
- Follow company safety policies
- Other duties may be assigned

PREFERRED QUALIFICATIONS:

- 2-year degree or formal education in electronics, manufacturing, automated machinery, or similar technical field, or 4+ years relevant experience in technician roles.
- Electronics certificates preferred
- IPC 610 solder certification preferred
- Drafting software experience preferred
- Excellent verbal and written communication skills required

HOW TO APPLY:
Interested candidates should send in their resume, cover letter, and salary expectation to Alexandra Galvez at vacancies@xppower.com.
