POSITION TITLE: Supply Chain Engineering Intern

POSITION LOCATION: Reno, NV

POSITION DESCRIPTION:
Arrow Electronics is seeking two Supply Chain Engineering Interns to join the team full time over the summer of 2018. Arrow Electronics’ Reno supply engineering team primarily focuses on three areas: Process Improvement, Project Management, and Strategy. This is a paid internship. Duties include, but are not limited to:

- Evaluating processes using engineering principles and recommend improvements
- Developing ROI recommendations for projects based on quantitative and qualitative data analysis
- Implementing and maintaining 5S initiatives in a designated area
- Developing an engineering standard and show the cost benefits of employees reaching a set level of performance
- Designing a pick cart in AutoCAD for use in the picking area that will enable associates to work at least five percent faster than using the current cart
- Developing two-dimensional warehouse layouts using AutoCAD
- Building relationships with industry subject matter experts

QUALIFICATIONS:
- Currently a sophomore or junior pursuing a Bachelor’s degree in Technology, Business, or Quality
- Available to work full-time (forty hours per week) during the summer (May or June through mid-August); available start dates are May 21, May 29, June 4, or June 11 and the earliest end date is August 17
- 3.0 GPA or higher
- Strong verbal and written communication skills

HOW TO APPLY:
Interested applicants should apply online.
