POSITION TITLE: Aeronautics-Related Student Team-Oriented Internship

POSITION LOCATION: Cleveland, OH

POSITION DESCRIPTION:
NASA Glenn Research Center (GRC) is offering two paid team-oriented and aeronautics-related, on-site internship opportunities to qualified STEM students of United States citizenship during the summer of 2018. GRC plans to competitively select a total of eight students to be split into two equal teams of four students per team to work on challenging and rewarding projects on-site at GRC for ten consecutive weeks starting on June 4, 2018. The two projects included are “Community Noise Impact of Urban Air Mobility Operations” and “Weather Tolerant Operations for Urban Air Mobility.”

QUALIFICATIONS:
- Undergraduate Seniors, Rising Seniors, and Master’s students are sought out
- Discipline that focuses on any of the following: Aerospace Engineering, Computer Engineering, Electrical Engineering, Mechanical Engineering, Integrated Engineering, Applied Mathematics, and Physics

HOW TO APPLY:
The two projects are currently posted in NASA’s One Stop Shopping Initiative (OSSI) application system. Interested applicants are encouraged to submit an application before 11:59 on Friday, March 16. The OSSI can be found online.
