POSITION TITLE: Summer Engineering Student Intern

POSITION LOCATION: Las Vegas, NV

POSITION DESCRIPTION:
RCI Engineering is offering an opportunity for an engineering student looking to develop their skills and grow with the company. RCI Engineering is seeking an undergraduate or graduate student majoring in civil engineering who is knowledgeable in AutoCAD to design land development projects. The company seeks an individual who is ready to start putting classroom work into practice by participating in various stages of civil design work. The individual will gain broad experience in various aspects of civil engineering not discovered in coursework. This position is focused on design and development of plans and drawings, primarily for residential and commercial land development projects, which may include the development of preliminary layout and/or final drawings of roadways, sanitary sewer lines, storm drains, waterlines, and grading.

QUALIFICATIONS:
- Current student at an accredited college or university majoring in Civil Engineering
- Ability to work in a fast-paced, team environment

HOW TO APPLY:
Interested applicants should send in resumes to Amy Armstrong at aarmstrong@rcinevada.com.
