POSITION TITLE: Associate Staff Engineer I

POSITION LOCATION: Carson City, NV

POSITION DESCRIPTION:
Staff Associate Engineers perform professional engineering assignments not requiring licensure by the State Board of Professional Engineers and Land Surveyors. This position is within the Traffic Operations Division. The Incumbent will develop and implement statewide policy and guidance regarding highway operations by developing and overseeing he Intelligent Transportation System (ITS) programs and projects. This includes ITS planning studies used to establish regional master plans and statewide ITS architecture ensuring that new and existing ITS systems are coordinated, integrated, and aligned with both the plans and policies in place. In cooperation with other agencies and divisions incumbent will initiate and develop statewide and multi-state programs and agreements by assessing needs, priorities, and problems affecting traffic operations and reliability and making determinations on how best to address those needs. Responsibilities include, but are not limited to, planning, project scoping, programming, prioritizing, project design development (in-house design or by a consultant), and coordinating with other divisions and districts as necessary. Other duties include training and delegation of duties to subordinate positions.

MINIMUM QUALIFICATIONS:
- Certification by the Nevada State Board of Professional Engineers and Land Surveyors as an Engineer Intern, a Bachelor’s degree from an accredited college or university in Civil Engineering or a closely related engineering field, two years of journey-level technical experience equivalent to an Engineering Technician III in Nevada state service, or an equivalent combination of education and experience
- Requires valid driver’s license or evidence of equivalent mobility at the time of appointment and for continuing employment

HOW TO APPLY:
Interested applicants should apply online.
