POSITION TITLE: Associate Staff Engineer I

POSITION LOCATION: Carson City, NV

POSITION DESCRIPTION:
Staff Associate Engineers perform professional engineering assignments not requiring licensure by the State Board of Professional Engineers and Land Surveyors. This position is within the Construction Division. The Incumbent is responsible for the reviewing of plans, specifications, and special provisions for accuracy, completeness, and constructability providing recommendations as needed. The incumbent will be responsible for attending project meetings necessary to ensure quality control for highway construction. Additional responsibilities include, but are not limited to:

- Calculating liquidated damages, working days, fuel factor, user cost, and assisting in the development of Limitations of Operations and Transportation Management Plans (TMP) as requested
- Developing Time Determination Schedule (TDS) to determine working days
- Documenting assumptions used in the development of all TDS schedules
- Performing project field reviews at various stages of project design and providing engineering recommendations

MINIMUM QUALIFICATIONS:
- Certification by the Nevada State Board of Professional Engineers and Land Surveyors as an Engineer Intern, a Bachelor’s degree from an accredited college or university in Civil Engineering or a closely related engineering field, two years of journey-level technical experience equivalent to an Engineering Technician III in Nevada state service, or an equivalent combination of education and experience
- Requires valid driver’s license or evidence of equivalent mobility at the time of appointment and for continuing employment
- Experience in interpreting plans, specifications, and estimates of roadway construction required

HOW TO APPLY:
Interested applicants should apply online.
