POSITION TITLE: 2018 Summer Civil Engineer Assistant

POSITION LOCATION: Bay Area, CA

POSITION DESCRIPTION:
BKG Engineers provides engineering, surveying, and land planning services for architects, commercial, and residential developers, colleges and universities, cities and countries, governmental agencies, hotels, health care facilities, and large corporations. BKG Engineers is searching for civil engineering interns with strong technical abilities and express an interest in land development project design, transportation project design, or water resources and are able to work with a team of engineers on small and large projects. Assignments may consist of geometric calculations and plotting (cross-sections, profiles, etc.), routine hydraulics calculations, site grading calculations and plotting, computer and CAD systems usage, and research/data collection from public agencies. The successful candidates would work forty hours per week over the course of the summer.

MINIMUM QUALIFICATIONS:
- Currently enrolled in Bachelor’s degree program in Civil Engineering or related field from an ABET accredited curriculum or equivalent plus appropriate continuing education
- Between one and two years of specific civil engineering classes and/or other internship related experience
- Must have strong communication skills and be team-oriented

SALARY INFORMATION: Hourly wage of between $18 and $20 per hour

HOW TO APPLY:
Interested applicants should apply online.
