POSITION TITLE: Engineering Intern

POSITION LOCATION: Carson City, NV

POSITION DESCRIPTION:
Chromalloy is a global supplier of advanced repairs and services for gas turbines used in aviation and land-based applications and repairs. The company refurbishes and manufactures engine components and designs and manufactures FAA-approved replacement parts for aircraft engines that are certified to meet or exceed the performance, reliability, and durability specifications of original equipment manufacturer parts. Chromalloy is looking for a motivated and detail-oriented Engineering Intern to work at its Carson City facility. The candidate will be working with an experienced team of engineers and production technicians in a fast-paced aerospace manufacturing environment. This will be a full-time position during the summer (with some flexibility). Daily tasks include, but are not limited to:

- Supporting existing products and/or processes with help from other engineers
- Performing dimensional analysis and calibration of fixtures, tooling, and parts
- Participating in continuous improvement activities
- Writing procedures, specifications, and other technical documents with oversight
- Performing process audits with guidance from the Quality Assurance Department
- Preparing and assisting with analysis of metallurgical evaluations
- Adhering to all company health, safety, and environmental policies while performing job duties
- Adhering to and promoting Company Quality System
- Regular and reliable attendance

QUALIFICATIONS:

- Ability to read and write in English (required)
- Ability to use Microsoft Office products (Word, Excel, and PowerPoint) [required]
- Ability to read and interpret blueprints and technical drawings (preferred)
- CAD experience (SolidWorks, NX, KeyCreator, or others) [preferred]

HOW TO APPLY:
Interested applicants should email contact information and resume to Mike Fena at mfena@chromalloy.com.
