POSITION TITLE: Summer Intern

POSITION LOCATION: McCarran, NV

POSITION DESCRIPTION:

Aqua Metals' Process Engineers are focused on providing exemplary service to develop, implement, operate, and improve Aqua Metals' processes in the planet and helping the company achieve its mission—to be the green company and be a quality leader. The Intern will know how to work in a collaborative environment, regularly interacting with operations, engineering, and quality departments.

Responsibilities include, but are not limited to:

- Assisting in document process
- Assisting in providing statistical capability analysis
- Assisting in day-to-day monitoring for manufacturing processes
- Assisting with identifying solutions for process issues and ways to lead to the desired goals

QUALIFICATIONS:

- Student in an Extractive Metallurgy, Chemical Engineering, or Electrochemical Engineering or an Associate's degree with two years of related experience
- Some hands-on experience in industrial setting
- Have interest or meaningful exposure in electrolysis, extractive metallurgy/electrowinning/electrorefining/hydrometallurgy
- Knowledge of mineral processing
- Electrolysis experience
- Extrusion experience
- CAD skills and experience
- Knowledge of chemistry and statistics
- Ability to communicate and engage effectively within and outside of the company

HOW TO APPLY:

Interested applicants should send their resume to Sam Mohanta at sam.mohanta@aquametals.com.
