POSITION TITLE: Steel Pipe Fabrication

POSITION LOCATION: Reno, NV

POSITION DESCRIPTION:
MDU Construction Services Group provides a full spectrum of construction solutions from underground utilities and excavation to electrical, mechanical, and fire suppression systems as well as transmission line construction.

The company is seeking a candidate to work in Steel Pipe Fabrication to perform general labor tasks as they pertain to metal and pipe fabrication. Major responsibilities include, but are not limited to:

- Observing and obeying all safety rules
- Performing welding, grinding, and threading of pipe
- Assisting with the loading and unloading of pipe, fitting, and other devices
- Using a variety of power tools including chop saw, plasma cutter, roll cutter, and cut groover
- Performing local deliveries of materials to jobsite, picking up materials for projects, and operating a forklift to move products and material
- Performing other duties as assigned to meet business needs

MINIMUM QUALIFICATIONS:

- High school diploma plus some work-related training and/or experience
- Proficient in the use of hand tools, power tools, and cleaning and moving equipment
- Basic knowledge of safety practices and procedures
- Ability to make accurate measurements with tape measure along with accurate counts of pipe and fittings
- Basic knowledge of pipe and fittings is helpful

HOW TO APPLY:
Interested applicants should apply online or complete an Application for Employment and email it to Catherine Jones at Catherine.Jones@mdu.com.
