POSITION TITLE: Firmware Engineer

POSITION LOCATION: El Dorado Hills, CA

POSITION DESCRIPTION:
Broadridge is a global fintech company with over eight billion dollars market capitalization and are recognized as an invaluable partner for the world’s leading companies and financial institutions. Broadridge provides advanced communications, technology, data, and analytics solutions for the financial services industry and businesses.

Broadridge is seeking an entry-level Firmware Engineer for the company’s state-of-the-art facility. As Firmware Engineer, the successful candidate will perform embedded systems programming for standard systems as well as other engineering support tasks (such as research and documentation). The Firmware Engineer will apply an understanding of basic software and control systems engineering principles to solve design-related problems. In addition, Associate Firmware Engineers assist in the establishment of software design guidelines and practices.

QUALIFICATIONS:

- Recent college graduate with a Computer Science or Computer Engineering degree (specializing in low-level, real-time, machine control programming)
- Zero-to-one years of relevant work or internship experience

HOW TO APPLY:
Interested applicants should apply online.
