

Quality Assurance Tester

Direct Placement

Top 3 Skills:

1. Attention to detail and critical thinking
2. Working hands on and on pace with the Engineers
3. Microsoft Suite Experience

Overview:

This company is a fast paced, innovative new gaming studio searching for qualified candidates to contribute to the popular and challenging world of creating games for the slot gaming industry and the casual gaming market. This is a full-time opportunity for the right candidate to join their team! This position provides an opportunity for someone looking to experience the fun and exciting world of making games!

They are looking for someone who is working more real time alongside the Engineers with the ultimate goal of minimizing the amount of time taken from idea to implementation. When the Engineer puts new features in the game, they want the QA person to get hands on and give real time feedback to the Engineers to make things run more efficiently with the overall goal to not delay the quality of the game. A key to success for this position is being self-motivated with a desire to challenge yourself and most importantly to be on pace with the Engineers. This person must have a fluid and flexible attitude, take initiative, and be able to establish there is a problem and articulate how to explain the problem to the Engineer while ensuring critical information is not left out. This person must be open to a team-oriented environment!

Requirements:

- Candidate must be a highly motivated, creative team member willing to work among a diverse, creative and talented group of gaming professionals, while possessing the following skill sets:
 - Attention to detail and the ability to understand carry out instructions, repetitively and accurately, every day without close supervision
 - Intermediate skills in Windows
 - The ability to learn Linux
 - Intermediate skills in Microsoft Office
 - Intermediate skills in Microsoft Suite
 - Problem Solving
 - Strong written and verbal skills
 - Ability to “thinking outside the box”
 - Must be willing to work in a close team environment
 - Experience with Adobe Suite is a plus
 - Experience with bug tracking product is a plus

OUTSTANDING cultural fit - the team is small and family oriented, they are jokesters and truly live the work hard play hard mentality

TECHNICAL SKILLS = Linux (someone that is capable of learning or at a beginner level, expert level with Microsoft Suite, expert level with Windows, experience in Adobe Suite is a plus, experience with Jira or similar bug tracking product is a plus)

Work Environment:

- Office size is around 14 total
- This person will be working with 1 QA Intern, 1 Game Designer, 1 Artist/Sound Person, 1 Engineer, and 1 Producer
- Laid back environment but this is not to say they don't hustle extremely hard each and every day

Interview information:

- 1 in person sitting down with 2 on the team
- 1 in person sitting down with the rest of the team

Compliance:

- Background Check
- Drug Test
